## WOOD/PELLET STOVE PROCEDURES

When an applicant is looking to install ANY TYPE of stove into the fireplace or connect it into an existing chimney, the following **MUST** be done **PRIOR** to the issuance of the Permit and or the utilization of the stove:

1. A certificate from a chimney cleaning company stating that they have cleaned and have examined the chimney and found it to be safe to use.
2. The Building Permit is to be obtained **BEFORE** the unit is installed and inspected **BEFORE** it is inserted into the fireplace.
3. The Installation Book is to be on the site at the time of inspection.
4. In accordance with 527 CMR 31.00 a Carbon Monoxide Detector is required to be installed at time of inspection.
5. **THE WOOD/PELLET STOVE IS NOT TO BE OPERATING UNTIL AFTER THE INSPECTION IS PERFORMED.**

### WOOD/PELLET STOVE INSERTS

1. They are to be inspected **PRIOR TO THE UNIT BEING INSERTED INTO THE FIRE PLACE.**

### INSTALLING WALL PROTECTORS

If a Wall Protector is to be used, a drawing of how it is going to be constructed must accompany this application. The Wall Protector must meet CABO 1&2 Family Building Code and NFPA 211.

### EFFECTIVE IMMEDIATELY

A wood/pellet stove **cannot** vent into a chimney used by either an oil fired furnace or one by gas. They must vent into a flue solely used by the stove only.
